HOUSES 04

We all need a house to live in. It protect us from heat, cold, rain, thieves and wild animals. Different people have different types of houses.

Types of Houses
In cities and towns, a house is made up of bricks, steel, wood and cement.

In villages, the houses are usually made from grass, bamboo, leaves, mud and straw.

A tent is a movable shelter. These are made of cloth called canvas. People use tent when they go for camping. In deserts around the world.

Roofs
A house has a roof, walls doors and windows. Some houses have flat roofs. Houses in hot places have flat roofs. Some houses have sloping roofs. In places of heavy rains and snow houses have sloping roofs.

Many people are needed to build a house. An architect draws a design for the house. A mason mixes cement and builds the walls. A carpenter makes the doors and windows. An electrician fixes the lights and fans. We need plumbers the fix taps and pipes in the house.

Fastrack Notes

- A house protects us from heat, cold, rain, thieves and wild animals.
- Houses made of bricks, cement, wood and steel are strong.
- Houses made of mud, hay and straw are not too strong.
