CHAPTER - 4 'BIG AND SMALL ANIMALS'

Notes

There are different kinds of animals that live around us. They are of different shapes and sizes. Big or small—each of them need food, water and shelter to survive. They live on land, in forests, in deserts, in water, on trees and under the ground.

Animals Around Us

The blue whale is the largest animal on Earth. It lives in water. On land, the African bush elephant is the largest, whereas the giraffe is the tallest animal. The ostrich is the largest bird.

Blue whale African bush elephant Ostrich Giraffe

Some big animals like tigers, bears, zebras, kangaroos, elephants, hippopotamus and rhinoceros live in forests. They are called **wild animals**.

Kangaroo Hippopotamus Bear Shark

Sharks, dolphins and camels are also big animals. Do you know where they live?

Small animals like rabbits, porcupines and snakes also live in the wild. Other animals like dogs, cats, frogs, lizards and butterflies are small animals.

Rabbit Porcupine

There are some animals that live with humans and are tamed. They are called **domestic animals**. Horses, cows, buffaloes, camels, sheep and goats are some domestic animals.

Many animals like the giant panda, polar bear and penguins live only in specific regions where conditions are suitable for their survival.

Animal Bodies and Movements

Different animals have different bodies. Animals have different kinds of legs, wings, heart, bones, beaks, **feathers**, fur and **scales**. Some animals move with the help of their legs, some use wings to fly and some animals swim. Some animals do not have legs at all. Animals move from one place to another in search of food, shelter and to protect themselves from enemies.

Legs and feet

Animals move in different ways. They walk, run, **hop**, swim, fly, creep and crawl. All animals do not have four legs—some have four legs, some have six and some have eight. Elephants, camels, dogs and cats use their legs to walk. Tigers, leopards, cheetahs and horses run very fast using their legs. The cheetah is the fastest land animal.

Kangaroo

Cheetah

feathers: soft covering on a bird's body; **scales:** a flattened ridge plate forming part of the body covering of birds;
hop: a short, quick jump

Rabbits and kangaroos hop on the ground. All these animals have four legs. Birds have two legs that help them **perch** on trees and walk and hop on the ground. Some animals like frogs, penguins and ducks have **webbed** feet that help them swim.

Penguin

Duck

Wings

Birds use their wings to move. They have two legs and two wings which are covered with feathers. Eagles, vultures and emus are **big birds**. Parrots, pigeons, sparrows and crows are **small birds**. Wings help birds to fly and move from one place to another. The bones of birds are **hollow**. Hence, they can easily lift their bodies for flight.)

Sparrow

Emu

Exercise work

Q-1 Name them

1. Largest bird _____
2. Tallest animal _____
3. Largest animal on the earth _____
4. Largest animal living on land _____
5. Wild animals _____

Q-2 what are the different ways in which animals moves?

Q-3 what is the difference between wild animals and domestic animals?

Q-4 write the name of big birds and small birds?

Q-5 Fill in the blanks.

1. The _____ (body/bones) of birds are hollow hence, they can easily lift their bodies for flight.
2. Some animals like frogs and _____ (storks/penguins) have webbed feet that help them to swim.

ANSWERS

Ans-1 Name them

1. Ostrich
2. Giraffe
3. Blue whale
4. The African bush elephant
5. Tigers, bears

Ans-2 Animals move in different ways such as:

Some animals move with the help of their legs. Some animals use their wings to fly and some animals swim, hop (a short, quick jump) and creep and crawl.

Ans-3 Some big animals live in forest. They are called **wild animals**. For example, tigers, bears, zebras, kangaroos, elephants, rhinoceros.

Some animals that live with humans and are tamed are called **domestic animals**. For example, horses, cows, buffaloes, camels, sheep and goats.

Ans-4 1. Big birds: eagles, vulture and emus

2. Small birds: parrots, pigeons, sparrows and crows

Ans-5 Fill in the blanks

1. Bones
2. penguins
