

North-Ex Public School(Recognised)

Subject-- EVS(Lesson -2 Senses of touch and smell)

Worksheet

Summary (sense of touch) :-

The skin is the outer covering of the body.It covers the whole body and protects the body parts underneath. The skin is the largest organ in the human body. It help us to feel the things that we touch .The skin contains nerve endings which detect the sensation like touch, heat ,pain etc When we touch any object , the nerve ending in the skin send signals in the brain and part of our body take action.Good touch - When someone touches us and we feel comfort ,good and encouraged , it is called good touch. for ex: When your teacher or parents pats on your back.Bad touch - When someone touches us and we do not feel comfortable , it is called bad touch. Skin also act as an excretory organ because it takes out excess water and salt from our body in the form of sweat.
