13. Read the passage and answer the following questions :

The computer can work out calculations and provide answers to complicated problems in a flash. A man would take days or even months to work out the same thing. But it can not do things on its own. All the information it needs to do something is to be fed into it. This information is called data. The computer also has a memory. It can store information and use it later. It can therefore, be compared to human brain. But can solve problems much faster and more accurately than the human brain. It can be made to play games like chess and can translate words from one language to another. But it can not take decisions or think up new ideas. That is where it can not compete with the human brain.

- (1) What is data ?
- (2) What can computer do ?
- (3) In what way is the computer better than the human brain ?
- (4) Give a suitable title to the passage.

OR

India is facing many dangerous problems. The main problems among them are the unemployment, pollution, population and illiteracy. Due to these harmful problems our country can't progress well.
